ABOUT MYSELF

Hello, I'm Carmen!

A developer with 10+ years of experience now based in Malmö, Sweden.

I'm a passionate *full stack developer* working at a Swedish tech company, while also pursuing personal projects and selective freelance collaborations. Living in Sweden has strengthened my appreciation for its culture of innovation, inclusivity, and balance — values that align with how I build and collaborate.

My expertise lies in *developing thoughtful management and communication platforms* for companies and private clients. I love turning complex ideas into elegant, functional solutions with a focus on usability, collaboration, and long-term impact.

WORK EXPERIENCE

 **ELVA11** – MALMÖ, SWEDEN

DRIVING LICENCE

Driving Licence: B

VOLUNTEERING

2009 – 2010 Parma, Italy
Support Volunteer — Italian Civil Service Program

Driven by a desire to take a break from academic studies and contribute meaningfully to society, I decided to join a volunteer program. The opportunity arose when the wife of my programming professor, who managed a cooperative participating in the social service volunteer program, warmly welcomed me to join their initiatives.

- Facilitated activities as an animator and provided *social support* to groups of young people, fostering teamwork and personal development.
- Assisted and supported individuals with disabilities, *ensuring their inclusion* and active participation in community programs.

- Offered childcare and educational support in a preschool environment, helping to organize activities and provide hands-on *assistance to teachers*.
- Worked alongside individuals recovering from challenging experiences, including former inmates, to assist in their *reintegration and personal growth* through structured activities and mentorship.

● MANAGEMENT AND LEADERSHIP SKILLS

Web Frontend

My strongest and most accomplished skill. Ever since *I was 11*, I've been captivated by the art of designing websites. My journey began with coding a project dedicated to my favorite anime, and that early passion has only grown stronger over the years. Today, I turn ideas into engaging, functional, and user-friendly web experiences.

Web Backend — API

I can't imagine a life without coding — the satisfaction of turning a problem into a solution and seeing it come to life with *a triumphant "It works!"* is unmatched. My journey with programming began in high school, and it has been a defining passion and integral part of my life ever since.

Design — Graphics

Designing user navigation experiences is the most entertaining part of my work. I take inspiration from well-crafted experiences I encounter daily, reimagining them to *fit the unique needs* of my clients. My goal is to create designs that are not only visually appealing but also functional, ensuring that every interaction feels natural and effortless.

Teamwork

Last but not least, my *teamwork and project management* skills, developed over years of experience as an employee and through collaborations with other professionals. I have managed projects created by multiple contributors and have taken on *various roles* within the overall design process.
